

## USER ONBOARDING

### Requirements:

#### XAMPP Server

To download and install XAMPP server for windows use the below link.

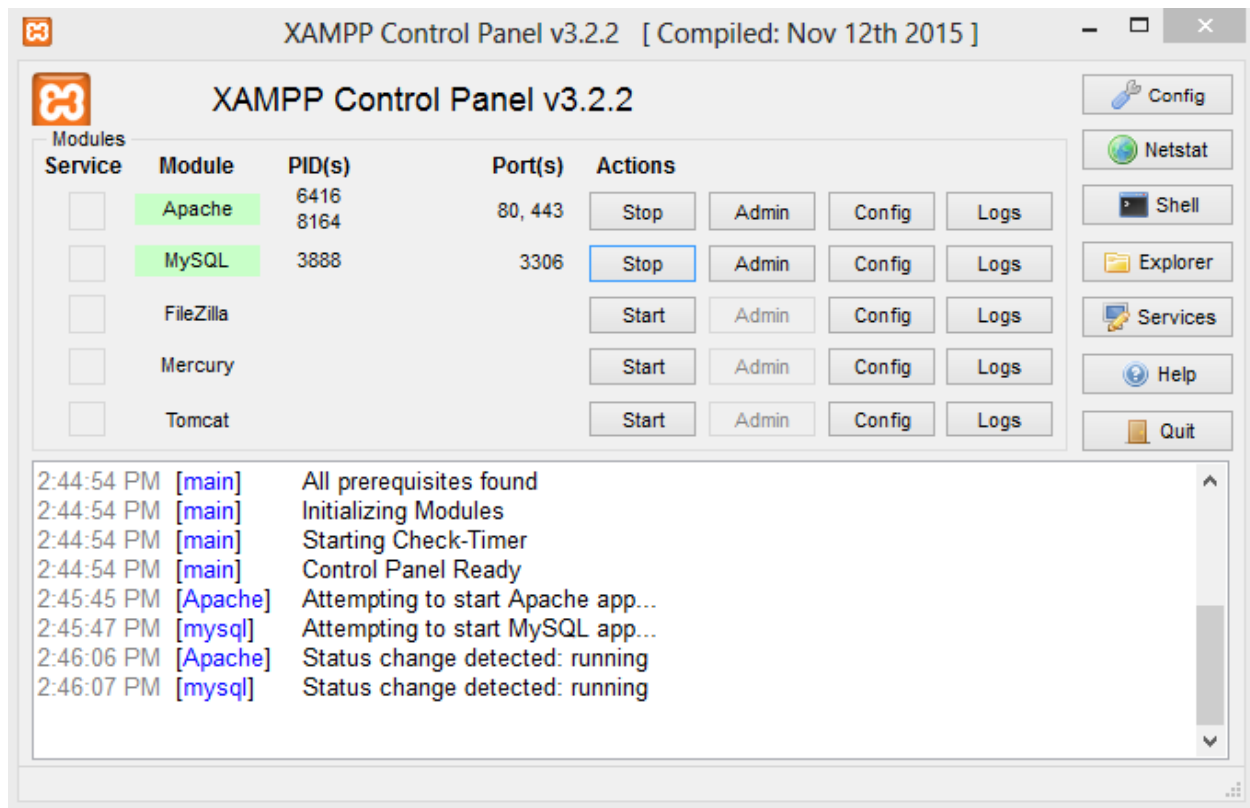

<https://pureinfotech.com/install-xampp-windows-10/>

To download and install XAMPP server for windows use the below link.

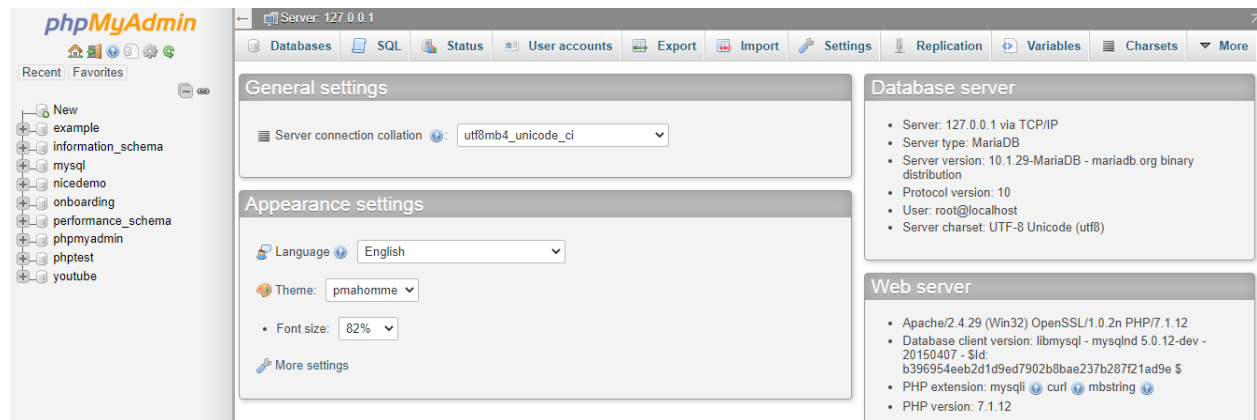

<https://www.intelliwolf.com/how-to-install-xampp-step-by-step/>

### Procedure:

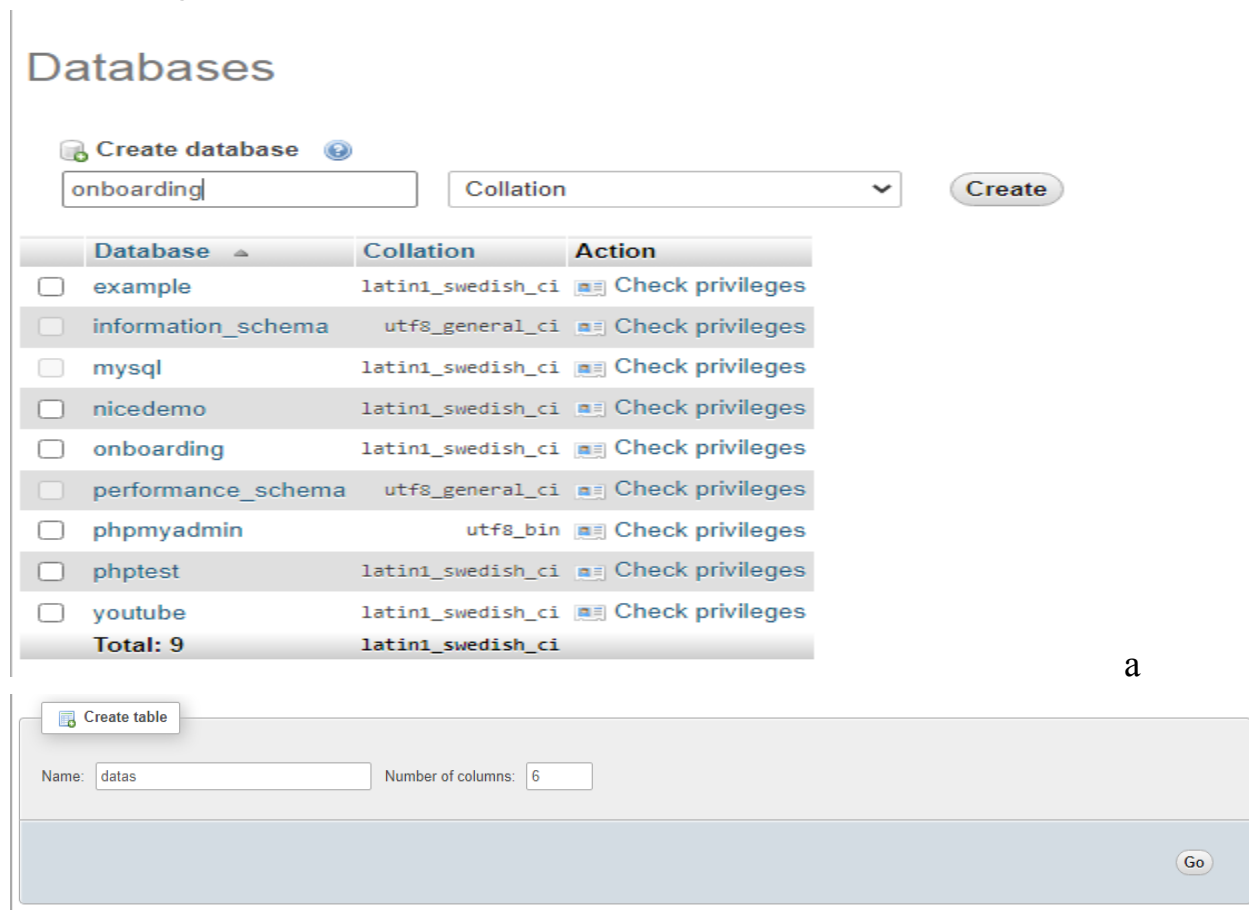

Step 1: Search XAMPP in search bar and double click to access the XAMPP.

Step 2: Start the XAMPP mysql module and click the “Admin” button to create the database and table.

Step 3: Click the New in phpMyAdmin to create a database. Database name as “onboarding” and table name as “datas” with 6 columns.

Step 4: Create 6 columns like id->int->A\_I for (Primary key), name->varchar->255, email->varchar->255, contact->varchar->20, password->varchar->255 and date->DATE.

id	INT		None				PRIMARY	<input checked="" type="checkbox"/>
<small>Pick from Central Columns</small>							PRIMARY	
name	VARCHAR	255	None				---	<input type="checkbox"/>
<small>Pick from Central Columns</small>								
email	VARCHAR	255	None				---	<input type="checkbox"/>
<small>Pick from Central Columns</small>								
contact	VARCHAR	20	None				---	<input type="checkbox"/>
<small>Pick from Central Columns</small>								
password	VARCHAR	255	None				---	<input type="checkbox"/>
<small>Pick from Central Columns</small>								
date	DATE		None				---	<input type="checkbox"/>
<small>Pick from Central Columns</small>								

Step 5: Move the folder “onboarding” to C:\xampp\htdocs.

Step 6: Start the Apache server in XAMPP and open any browser and paste the url <http://localhost/onboarding/register.php>

Login

Step 10: After login the page it redirects to a Profile page, containing the details used in the sign up page.

Step 11: If you need to edit the given data click the “Edit” button to change the data.

## User Profile

First Name	Last Name
<input type="text" value="Tested"/>	<input type="text" value="test"/>
Email ID	
<input type="text" value="test@gmail.com"/>	
Date of Birth	Phone Number
<input type="text" value="06/04/2000"/> 	<input type="text" value="8585858585"/>
Password	
<input type="password" value="....."/>	
<input type="checkbox"/> Show Password	
<input type="button" value="Update"/>	<input type="button" value="JSON"/> <input type="button" value="Cancel"/>

Step 12: After completing the correction in given data either click the “JSON” button to download the given data in json format in **“C:/xampp/htdocs/onboarding/json.json”** or click the “Update” button to update the changes. It again redirects to the Profile page.

## User Profile

First Name	Last Name
<input type="text" value="Tested"/>	<input type="text" value="test"/>
Email ID	
<input type="text" value="test@gmail.com"/>	
Date of Birth	Phone Number
<input type="text" value="06/04/2000"/> 	<input type="text" value="8585858585"/>
Password	
<input type="password" value="....."/>	
<input type="checkbox"/> Show Password	
<input type="button" value="Update"/> <input type="button" value="JSON"/> <input type="button" value="Cancel"/>	

File Downloaded Success fully in  
C:/xampp/htdocs/onboarding/json

Step 13: After completing editing you can see the updated field in “Profile page” and then you can click the “Logout” button. To redirect into the Login page.
